

IT.0375.IE INDUSTRIAL KIT EDUCATIONAL KIT FOR INDUSTRIAL ELECTRICAL PLANTS

The "INDUSTRIAL KIT "IT.0375.IE consists of a wide range of educational modules, built in insulating material (see modules list).

The components are clearly identified by their silk-screened electrical normalised symbol. All the modules include industrial standard quality components (manufactured from the world's leader companies), which are commonly used in typical industrial electrical plants.

The connections among the various modules can be quickly performed by means of safety standard sockets CE 4 mm, protected against accidental contacts and located on each panel. The kit includes a technical manual with a wide range of exercises with increasing difficulty and high-reliable cables.

All modules are designed for a quick assembling on a vertical-frame (supplied in option).

The modules included in the INDUSTRIAL-KIT system allow to perform a wide number of exercises of increasing difficulty in a safe and easy way.

The particular design of the system allows a great reduction of the learning time with great advantage for the educational activity.

It's possible to customize on request the standard modules foreseen providing add-on modules or assembling components of different kind or trademark at Customer's choice.

MODULES LIST

- N.2 5 fuse-holders with sectionable fuses
- N.1 220V/24V transformer
- N.4 remote control switch for industrial use
- N.6 24V ac delay relay (0-60 sec)
- N.3 24V ac auxiliary relay
- N.2 3 industrial pushbuttons
- N.2 3 lamp-holders and 24V lamps
- N.1 three-phase bridge
- N.2 thermal relay
- N.2 micro switch operated by mechanic lever
- N.2 inductive micro switch with positive voltage
- N.2 inductive micro switch with negative voltage
- N.1 three-pole switch
- N.1 three-pole changeover switch
- N.1 three-pole reversing switch
- N.1 star-delta switching starter
- N.1 dahlander motor commutator
- N.1 terminal board (dia. 2,45mm) on din guide
- N.1 terminal board (dia. 6mm) on din guide
- N.1 traffic light

AVAILABLE OPTIONS

- A) Module holder desk frame with feet of support "IT.0300.TE"
- B) Desk power supply unit "IT.0300.IE-A".
